EDUCATION

Lafayette College

BA Mathematics *GPA: 3.7*

Easton, PA

Aug 2019-May 2023

EXPERIENCE

SEI Investments Company

Data Engineer

Oaks, PA

July 2023-Present

- Designed and serve as point engineer for automated PowerBI deployment pipelines, enabling teams to deploy, sync, and update reports across workspaces through a scalable, modular, configuration-driven framework adopted across teams in both SEI's Wealth Platform and Investment Management Services.
- Built end-to-end reporting workflows using Snowflake, dbt, and Power BI, delivering client-facing analytics while ensuring data consistency and maintainability.

San Diego FC, Major League Soccer

Data Engineer/Front End Developer

Remote

May 2025-Dec 2025

- Engineered first in-house match analysis platform by rebuilding the club's legacy reporting workflows into a scalable React application, creating a unified, user-friendly interface that centralizes all pre and post-match reports and improves data accessibility for technical staff

Capology, Inc.

Developer

Remote

Sept-Nov 2023

- Created data pipeline to calculate comprehensive tax study for MLS player salaries across 2007-2023.

Lafayette Men's Soccer

Data Engineer & Analyst

Easton, PA

Jan 2023-Aug 2023

- Built custom player performance analysis dashboard and backend data pipelines using Wyscout platform and Python, from which insights helped improve team output by 14% and defence by 16%, contributing to team reaching Patriot League final after a two year absence.

SETI Institute

Research Intern

Mountain View, CA

June-Aug 2022

- Utilized advanced data analysis techniques, including Principal Component Analysis and clustering algorithms, to adapt New Horizons' models for Iapetus surface composition analysis. Under Dr. Cristina Dalle Ore's mentorship, this adaptation provided key insights into Iapetus's hydrocarbon makeup

PROJECTS

Washington Nationals Pitcher Dashboard (*React, TypeScript, Node.js, SQLite, Docker*)

- Built full-stack pitcher analysis dashboard featuring interactive movement scatter plots, contact quality breakdowns, inning fatigue trends, count heatmaps, and batter handedness splits, with drill-down modals and a pitcher comparison mode for side-by-side evaluation across key metrics.

ISA Food Tasting Event Planner (*React, Typescript, Node.js*) (In Progress)

- Developing a full-stack web app for Lafayette College's annual Food Tasting event, enabling 20+ cooking groups to manage members, submit dishes, and build grocery lists from Giant's inventory via real-time search and filtering. And streamlining event coordination by allowing organizers to consolidate ingredient orders and allocate resources across all groups

USSF/USWNT Midfielder Scouting Report (*Python, Streamlit, Plotly, Pandas, mplsoccer*)

- Built and deployed interactive scouting application comparing three USWNT central midfielders across 16+ performance metrics, featuring percentile-ranked radar charts, dynamic filtering, pitch event maps, and a composite Power Score system benchmarked against NWSL positional data.

Centsible (*React, Node.js, Python, SQL, Streamlit, PowerBI, Gmail API*)

- Developed full-stack personal finance tracking app with interactive dashboards and data visualizations to monitor expenses over time and analyze spending habits.

SKILLS

Programming: Python, SQL, Snowflake, PowerBI, DBT, React, Azure DevOps, Docker, Vercel

Certificates: Google Data Analytics Professional; StatsBomb Intro to Soccer Analytics

Other: Wyscout, Notion, WordPress, PhotoShop, Lightroom, Illustrator

AWARDS/MISC

Board Member/President, International Students' Association

April 2020-May 2023

Pi Mu Epsilon Honor Society

Feb 2022

Benjamin A. Gilman International Scholar

Dec 2021

Dean's List, Lafayette College

Dec 2019-May 2023
